Step 1: Click the highlighted tab “GRIEVANCE” at the Quick links

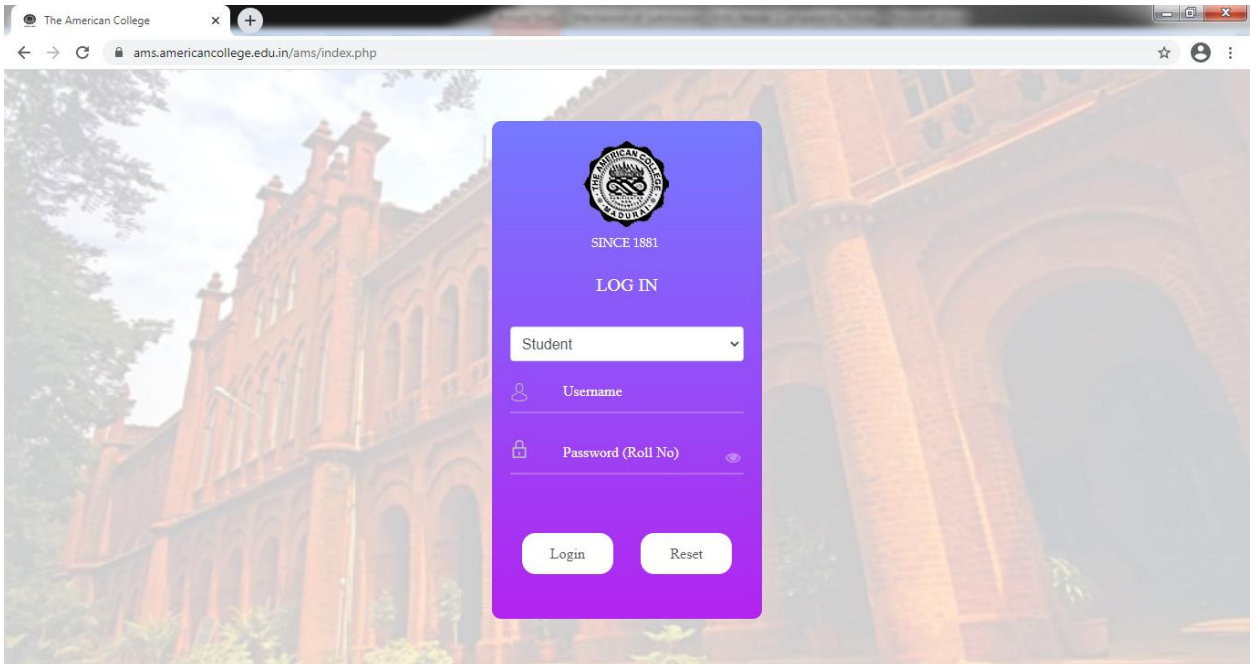

Step 2: Click the tab “STUDENTS”

The screenshot shows a web browser window with the URL americancollege.edu.in/the-college/committees/grievance/. The website header is blue with a navigation menu: HOME, THE COLLEGE, ACADEMICS, ADMISSIONS, DEPARTMENTS, CAMPUS, ALUMNI, GALLERY, CONTACT US. The banner also features a "STUDENTS" tab. The main content area is titled "Grievance Redressal Policy" and includes an "Introduction" section and a "Rationale for Mechanisms" section. The "Introduction" section states that The American College believes in total student autonomy in the campus, and it is unique about the college that generation of students cherish. It believes strongly that we students learn everything for life better only when they experience autonomy. Our concept of total autonomy inculcates in them a sense of responsibility, mutual trust, respect for the other gender, persons otherwise challenged, the socially marginalized, economically weak, and the juniors. It does not foster any kind of discrimination in the name of caste, creed, community, race, language, and age. Once a student join the college, they get a feeling that they are members of the same family. This feeling of togetherness binds everyone in the campus and it fosters zero tolerance for any kind of discrimination. Senior students are involved in socializing freshers from Day One of the College Orientation and Welcome Parties at the Department Level and in the Residential Hall. The college has the policy of inclusive Hostel Day celebrations wherein 1500+ residents, both men and women celebrate and learn mutual respect for each other. The "Rationale for Mechanisms" section states that However, a campus with 9000+ student students, 300+ faculty members, and equal number of non-teaching can theoretically witness unwanted and undesirable experience due to diversity and heterogeneity of the background of the population. Hence, as a measure of caution, the administration has put in place all possible mechanisms in nip any untoward incident that might pose danger to the ecology of the college campus. It scrupulously follows the guidelines issued from the statutory and regulatory bodies. In addition, the college has been having several built-in systems of governance to supervise the overall smooth functioning of total autonomy for students. INNOVATION AND INCUBATION POLICY

PREAMBLE: The American college, fostered by its long legacy, and strongly aided by the much needed knowledge base, necessary infrastructural support and intellectual capital is poised to spell out its innovation and incubation policy

MISSION:

- motivate the students and faculty to think aloud.
- encourage them to think globally and act locally
- create a conducive environment for the application of scientific thought into action in real-time world

ACTIVITIES:

- Popularize science by taking science to the villages ‘Science Jatha’
- Conduct science exhibitions at a grand level to the school students with opportunity to the viewers for hands-on experience
- Innovation and incubation of evolved procedures as a strategy for large-scale adoption through well-defined projects in terms of socially and environmentally relevant themes and thrust areas.

In a nutshell, our innovation and incubation policy is to create a conducive ecosystem for techno development and technology-transfer through the Central instrumentation facility of the college. Nurture a knowledge capital with tools, techniques and a team of committed youth to reflect upon the tradition and native wisdom of India. Envisage the growth and sustenance of a scientifically empowered India by subjecting ideas to scrutiny in a fair value-central, accurate and precise evaluation of scientific innovations, leading in forward spiral to a well-incubated and nurtured, good and services test.

INNOVATION ECO-SYSTEM

The American College as a citadel of Higher Learning in this part of the country has in its fold, precepts and practices that are unique enough to provide for the intense, state-of-the-art knowledge in the chosen subject and at the same time offers an extensive exposure through its Choice Based Credit System (CBCS) providing opportunities to move across the curriculum. The strength of the institution is the rapport it has built over the years through its research, outreach and extension activities. These attributes offer fresh ideas to stakeholders and motivate them to stay abreast and forge ahead of others attracting greater attention. However, it has to innovate and innovate in order to stay on top. Research of different shades and intent pursued at the American College provides a platform for the academic community to draw 360° perspective to transform issues of the community, industry and the nation into developmental projects providing tangible technology, goods and results.

The college through its legacy has the needed knowledge-base and necessary infrastructural support and intellectual capital developed over the years to make the institution numero *uno* in its class. The college has several **Centers of Research, Entrepreneurship Cells, Community Orientation Units and Incubation Cells**. There are also special centers and units with expertise, equipment, flow of fresh and new ideas so that an eco-system for creation and incubation of ideas could blossom in its time as innovations potential enough to emerge as technological break-through in its due course. Special centers of the college provide space for spade work and many pilot studies which have merged as important peer-reviewed research publications and funded projects of national importance. Be it, the simple cottage industry projects like **Candle, Soap and Sanitizer Making, Fermentation experiments, Mushroom Culture, Sky-Watching, Poultry, Apiary, Aquaculture, Medicinal and Endangered Plant Conservation Projects**, or Higher- End Laboratory work like **Molecular Diagnostics, Tissue Culture, Thin Film and Nano Material Preparations or Quantum Calculations on Elementary Particles and Neutrino Science** pursued here have often hit the headlines and have become the talk of the town.

Committed to the cause popularizing science, the grand open-school science exhibitions with provisions for public viewing conducted annually with a sizable budget comes as trade-off

taking science to villages and fostering scientific thought by finding space for application in the real time world. In a 'U' turn from the **Silo Modelling Approach** of upward mobility in each discipline, shift is made to bring all instruments, procedures and protocol for peer reference and comparisons under one roof in the newly launched **Centralized Instrumentation Facility** calling for pyramidal approach to harp on synergism with trans-disciplinary approaches.
