SINCE 1881

The object of the College is “to give students of all creeds, a liberal Christian higher education, to train them in the service of God and humanity and to do such other things as are in harmony with that object.”

A BRIEF HISTORY OF THE AMERICAN COLLEGE

The American College, a higher educational institution, is known for its focus on academic excellence and social relevance. Its pioneering role in the development of college autonomy in India in 1978, its successful early implementation of Choice Based Credit System under autonomy and its completion of 143 years of service bear testimony to the position that the college currently enjoys. Originally founded by American Missionaries in 1841, the American College grew into a collegiate department in 1881 at Pusalmai by the initiatives taken by Rev. G.T. Washburn, the Founder Principal of the College. In the year 1906, the college was shifted to the present campus during the time of second Principal Rev. W.M. Zumbro. It became independent of the Mission in 1934 when an autonomous Governing Council was formed to manage its own affairs. Earlier, it was affiliated to the University of Madras and later, it came under the jurisdiction of Madurai Kamaraj University in 1965.

With its extreme sensitivity to national policies and community needs, the college has grown from strength to strength. It is one of the first set of seven colleges to be made autonomous by the UGC in 1977-1978. Presently, the college offers thirty two undergraduate, twenty postgraduate courses & nine M.Phil programmes in the Main Campus. There are nine research centres offering Ph.D Programmes in various disciplines. It also has a Study Centre for Indian Literature in English and Translation (SCILET) that has received international attention. The college established its Satellite Campus in Chathirapatti in the year 2014-2015 to cater the needs of rural community. There are fifteen undergraduate, three postgraduate courses and one M.Phil programme in the Satellite Campus. The College, as part of its social commitment, established the UGC sponsored Community College offered skill-based courses from the academic year 2014-2015. The American College offers eight B.Voc. Programmes and four M.Voc. Programmes. The college was re-accredited (3rd Cycle) by NAAC with Grade “A+” CGPA – 3.47 on a 4 point scale in 2022. Its alumni shine as luminaries internationally as scientists, intellectuals, administrators, corporate managers, statesmen, and leaders. The college has active theatre groups, National Service Scheme (NSS), National Cadet Corps (NCC) units, Service Learning Programme (SLP) and Green Management Programme (GMP), Genders Studies Programme (GNS), Art,

Culture and Heritage (ACH), Library and Information Service Programme (LIB) that offer students a wide range of opportunities to serve society. These activities add up to make the campus vibrant for developing one's personality. The college has tie-ups with many International, State, Central Institutes and private industries.

XV CHOICE BASED CREDIT SYSTEM

The American College has been adapting itself to many changes in the curriculum. The global perspective of the college has also been a driving force to provide quality education to its students. Autonomy has provided a platform for each department to have their own departmental objectives and to design their own curriculum. CBCS empowers students to consciously choose a set of courses to meet their objectives. As a result of this, scholars with interdisciplinary background may emerge.

Intellectual depth and breadth characterize liberal arts and science undergraduate education. CBCS also allows students to cross the artificial boundaries of varied academic disciplines and enables them to get the insights of several disciplines bringing out the inherent interest and aptitude.

After two-year long deliberations, the faculty has brought out a version of the Choice Based Credit System that suits the needs and aspirations of the American College community. It is not just a change in the nomenclature but also a paradigm shift in the educational practices.

The following are also some of the other expected outcomes, of CBCS:

- To develop human resources to suit a wide range of career opportunities.
- To promote inter-departmental cooperation within the college for a better utilization of the existing infrastructure and human resources.
- To cross, institutional barriers by way of transfer of credits among accredited institutions.

Learning Outcomes-Based Curriculum Framework (LOCF) **(with effect from the academic year 2024-2025 onwards)**

Vision statement of The American College extends beyond mere academic excellence towards aspiring to become a Christian higher educational institution of global standards and reputation. Since its inception, the institution has remained steadfast in its commitment to providing quality education while nurturing values deeply rooted in the Christian ethos. Founded on principles of adaptability and responsiveness, The American College has continually evolved to meet the ever-changing landscape of education. Autonomy, granted by the University Grants Commission (UGC) in 1977-1978, empowered the institution to pioneer innovative changes in its curriculum, aligning with both national policies and community needs. The implementation of the Choice Based Credit System (CBCS) demonstrates the institution's commitment to student-centred education. Through CBCS, the institution has been developing versatile human resources capable of navigating diverse career opportunities while promoting interdisciplinary collaboration and facilitating credit transfer across accredited institutions.

Absolutely, the idea that learning should transcend boundaries reflects a commitment to a more holistic and integrative approach to education. This philosophy emphasizes that knowledge isn't confined to discrete subjects or institutions, but rather flows across and integrates various fields and experiences. By breaking down disciplinary silos, learners can make connections between different areas of study, fostering deeper understanding and more innovative thinking. For example, combining insights from science, humanities, and the arts can lead to richer perspectives and problem-solving approaches. This approach also encourages learning beyond traditional classroom settings, incorporating real-world experiences, interdisciplinary projects, and collaboration. It aims to prepare students not just with specialized knowledge but with the ability to adapt, think critically, and apply their learning in diverse contexts.

Keeping this principle in mind, the institution has embraced a Learning outcome-based curriculum framework (LOCF), inspired by a global perspective. This framework aims not only to equip students with the necessary knowledge and skills but also to instil in them a sense of purpose and a commitment to service. Inspired by the motto, "Purificatus Non Consumptus" (Purified, Not Consumed), the curriculum framework reflects the institution's overarching objective: to cultivate individuals who are not only intellectually enriched but also morally upright and socially responsible. As the institution embarks on the journey towards student-centric teaching and learning, it remains guided by its enduring mission: to train students in the service of God and humanity, in harmony with Christian values, and pursuit of excellence in all endeavours.
